Because implementation will require substantial financial resources from different types of public and private sources, the World Water Council and the Organization for Economic Co-operation and Development have set out to create a High-Level Panel on Infrastructure Financing for a Water Secure World. Chaired by the Secretary-General of OECD Angel Gurría, this panel will investigate the role of infrastructure to ensure water security and explore the necessary financial resources to generate them. It will also serve to follow up on recommendations emanating from the Camdessus Panel (2003) and the Gurría Task Force (2006).
